

# Turn-Key Choice for Formula, Testing, Packaging

## Broad Product and Production Capabilities

Radiator Specialty Company has a wide array of capabilities to fill specialty chemicals, lubricants, solvents, cleaners, and degreasers. Multiple high-speed, automated, state-of-the-art production lines fill a wide range of containers from liquid-pour metal cans and plastic bottles to aerosol cans in various sizes and shapes. Our packaging capabilities include the use of paper and vinyl labels, and lithographed cans. We can fill a range of automotive, industrial, and household products in our 500,000 square foot manufacturing and distribution facility.

## Quality Control

Radiator Specialty Company has a rigorous product quality process. The production team is dedicated to producing consistent quality throughout each production run. Each batch is subject to start-up, ongoing, and wrap-up quality audits. ISO 9001 standards are maintained from product initiation to completion. Finished product and boxes are quality inspected prior to shipping.

## Flexible Packaging Choices

Our assembly lines are flexible, enabling us to fill metal cans, plastic bottles, and aerosol cans in various sizes and shapes. We can produce product sizes from one ounce to 54-gallon drums. Aerosol propellants are non-flammable and include carbon dioxide and R134a. Closures include standard, child-resistant caps, and more.

## Various Packaging Alternatives Available

Radiator Specialty Company has automated and hand-packing capabilities available to meet customer needs. Product can be packed as it comes off the production line into shipping cartons that conform to DOT standards, or into cut-case point-of-purchase displays. Individual shipping cartons can be stacked into displays, then packed into master shipping cartons. Standard or custom pallet stacking alternatives are also available.

# *Design and Production in an ISO Environment*

## Chemists Develop and Test in a Complete Laboratory

We have a Ph.D. chemist with 20 years of experience leading a staff of degreed chemists and technicians. A large and complete lab conforms to ISO 9001 standards. Our motivated team has experience in a range of chemistries from water-based to petroleum to silicone. Formulas can be developed from an MSDS sheet, reverse-engineered, or developed from scratch to meet product and performance objectives.

## Long Runs or Short Runs

Clients can turn to Radiator Specialty Company for long or short runs to meet their needs and cost targets. We can package aerosol litho cans in runs of 25,000 or more. For short runs, we can wrap aerosol cans with paper or vinyl labels that look as good as printed litho. Large batches can be mixed in up to a thousand-gallon tank and small batches can be mixed in portable totes. We're flexible and capable.

## Packaging and Label Design

We offer a team of degreed graphic and package designers that are experienced in graphic reproduction technology. As needed, a product copywriter and a consumer insight specialist are available to guide the designer and client.

# Private Label Contract Packaging

**Humble Family Beginnings With Social Responsibility.** In 1924, while traveling through Charlotte, North Carolina, a traveling salesman named I. D. Blumenthal developed a leak in his car's radiator. A local tinsmith poured a magic powder into the radiator and the leak stopped. From that chance meeting, a partnership and a business that would become Radiator Specialty Company were formed. New products were developed over time. I.D.'s younger brother, Herman, joined him in 1937 creating a collaboration that would last for more than 40 years. Today, Radiator Specialty Company produces over 2,000 products sold in many industries worldwide. This family-owned business takes pride in providing long-term employment and giving back to the community.

**Radiator Specialty Company Is Your Source.** Radiator Specialty Company can develop and produce a broad range of chemicals and lubricating products for your business. We develop and fill private label products of nearly every type, including cleaning products, lubricants, degreasers, and chemicals for applications in automotive, trucking, household, industrial, plumbing, hardware, and more. Radiator Specialty Company can also provide a complete array of services to you including product and package design and testing, research and development, warehousing and distribution, and marketing services.

**Let Us Provide You With A Quote.** Telephone or email our National Account Manager, Don DeBouse, to discuss your needs. He is responsible for private label contract packaging. He will listen to you and make a recommendation. Then he will engage his team to prepare a quote for you. When we earn your business, Don will service your account during every stage of product development, commercialization, and life cycle. Please contact Don DeBouse at 704-684-1952 or [ddebouse@gunk.com](mailto:ddebouse@gunk.com).

**Makers And Marketers Of Our Own Branded Products.** Radiator Specialty Company has developed hundreds of successful products and acquired other companies and brands. Among our most widely recognized brands are Solder Seal®/Gunk®, Liquid Wrench®, Puncture Seal®, and Engine Brite®. Radiator Specialty Company is eager to help you develop and enhance your brand.
